Mickey,

After concluding our traffic study in Whiting Station on Gardenia Drive, it has been determined that **speeding** is not an issue along this roadway. On 03/23/23-03/30/23, the speed sign board captured all traffic traveling westbound on Gardenia Drive. During those time frames the 85th percentile of vehicles traveling westbound on Gardenia Drive were traveling 21.45 mph. The 85th percentile is the percentage of vehicles traveling at that speed or lower. On 04/01/23-04/11/23 the speed sign board captured all traffic traveling eastbound on Gardenia Drive. Durings those timeframes the 85th percentile of vehicles traveling eastbound on Gardenia Drive were traveling 21.55 mph. Even though **speeding** is not a problem on Gardenia Drive, the volume of traffic that travels eastbound on Gardenia Drive is high based of the statistics gathered from the traffic study. The traffic eastbound on Gardenia Drive is double the amount of traffic westbound. Any further information needed please feel free to reach out to me, my contact information is listed below.

Thank you,

Ptl. Conner Yatauro #413
